

Sample Document

This is just a sample document uploaded to your account.

The main purpose of it is so that you can see how it is linked from your index.html

If you look at the index.html file using notepad, you will see that it is

```
<h1>Index of Articles</h1>
```

```
<p>
```

```
<li><a href="./sample.pdf">Sample</a> - Just a sample document that has been uploaded to your  
account. It is in .pdf format
```

The “./sample.pdf” portion works because it is in the same directory as your index.html

If you were to create a directory such as /docs , you could use “./docs/sample.pdf”

Go ahead and try different things, then get rid of these sample file when you are done with it.
